

N CHARAN SAI

+91 94409400001 • Chennai, Tamil Nadu • charans.nallaguntla@gmail.com

ABOUT ME

Computer Science undergraduate with hands-on experience in software development, AI/ML, and backend technologies through DRDO internships. Strong foundation in Java, Data Structures & Algorithms, and modern AI systems, with experience building scalable real-world applications.

EDUCATION

SRM Institute of Science and Technology, Kattankulathur
B.Tech in Computer Science and Engineering (CORE)
CGPA: 9.17 (Till 6th Semester)

Expected 2027

Narayana Junior College
PCM Stream – Percentage: 96.6%

2023

SKILLS

Programming: Python | Java | C++ | SQL | JavaScript
Data & Analytics: DBMS | Data Analysis
Core CS: Data Structures & Algorithms | OOP | Operating Systems
AI/ML: Transformers | PyTorch | YOLOv7 | YOLOv8 | RAG
Tools & Cloud: Git | AWS

PROJECTS

Smart Warranty & Purchase Manager [\[GitHub\]](#)

- Developed a warranty and product management system using Java, Spring Boot, JPA, and MySQL.
- Designed and managed relational database schemas and SQL queries for products, warranties, repairs, and user data.
- Implemented JWT authentication, Spring Security, and BCrypt for secure user access.
- Built REST APIs for product CRUD, warranty tracking, and user-specific data management.

Kidney Stone Detection Using YOLOv8 [\[GitHub\]](#)

- Developed an AI model to detect kidney stones in ultrasound images.
- Used YOLOv8 and Faster R-CNN with ResNet-50 for object detection.
- Trained on annotated medical datasets with data augmentation.
- Achieved high accuracy, enabling faster and reliable diagnosis support.

EXPERIENCE

DRDO Hyderabad — AI/ML Intern (Transformers)

Jun 2025 – Sep 2025

- Worked on transformer-based deep learning models for defense applications.
- Implemented and optimized AI/ML solutions using Python and leading ML frameworks.
- Collaborated with scientists on research, model development, and data analysis.
- Applied self-attention and encoder-decoder architectures to real-world defense problems.

DRDL Hyderabad — AI/ML Intern (ANN & CNN)

Dec 2024 - Jan 2025

- Built a YOLOv7-based AI model for human detection in thermal images, achieving 93% precision
- Preprocessed and fine-tuned thermal image datasets to improve model performance in varying environmental conditions.
- Enhanced security and surveillance applications by enabling reliable human detection in low-light and night-time scenarios.

ACHIEVEMENTS

- Selected as a finalist in TechXcelerate, a national-level hackathon organized by BITS Pilani Hyderabad, based on technical merit and innovative problem-solving.
- Published a research paper on kidney stone detection using the YOLOv8 architecture.
- Received a merit scholarship in B.Tech

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate
- MongoDB Associate Developer
- SAP Generative AI Developer
- Oracle Certified Foundations Associate

EXTRA CURRICULAR ACTIVITIES

- NCC (C Certificate Holder)
- AARUUSH (Committee Head)
- Sports and Athletics
